## IT'S A FIRST-CLASS UPGRADE FOR PATIENTS WHO NEED A FULL-FACE MASK.

The ComfortGel™ Full mask — our first full-face gel mask with a replaceable cushion — reflects a commitment to innovative, practical product development that's been a RespiroNics hallmark for more than 30 years. Our popular blue gel and sure seal technology (SST™) will make it a patient favorite. Homecare providers also will appreciate its all-new design and our new approach to cushion resupply. We're confident you'll think the ComfortGel Full mask is in a class of its own.

ComfortGel™ Full

Envisioning tomorrow. Improving today.™

# ComfortGel™ Full

## Proven comfort and an all-new design make this full-face mask our best ever.

Respironics is leading the way to help more people get the healthy, restful sleep they need. We do that by combining the new with the proven — creating products that set new standards and quickly earn your trust. Our latest full-face mask is a perfect example.

The ComfortGel Full mask combines an all-new design with some very familiar — and popular — components. Our comfortable forehead cushion and enhanced StabilitySelector® combine with our popular blue gel replaceable cushion to create a level of comfort and stability no other full-face mask can approach. The unique sure seal technology (SST™) provides a membrane-thin layer over the gel cushion to follow the contours of the face better, allowing wearers to quickly achieve the comfortable seal they need.

The ComfortGel Full mask excels in a sleep lab setting thanks to its removable gel cushion, superior seal and easy-to-clean design. The DuoPack™ replacement kit offers homecare providers two same-size cushions for easier stocking and improved supply replacement opportunities. Patients needing to wear a full-face mask finally get the comfortable, robust-sealing mask they need for restful sleep. Solutions that improve the lives of patients, sleep professionals and homecare providers — one more way that Respironics is envisioning tomorrow and improving today.
