## Personalized fit and comfort

- **Micro makes (f)it easy** – MicroFit dial allows for up to 24 precise adjustments of the forehead support, setting the mask at the most comfortable position.
- **Proven seal** – Mirage™ dual-wall cushion technology reduces pressure on the nasal bridge and seals effectively.
- **A winning combination** – as you adjust the dial to your profile, the cushion works to seal effectively, so there is no need to over-tighten the headgear.
- **A range of sizes** – with five cushions to choose from, you'll find the perfect fit for you.

## Quiet, sleek and stylish

- **Quiet performance** – an array of small, built-in vents diffuses air gently and quietly.
- **Clear field of vision** – slender forehead support is unobtrusive and feels light on the face.
- **Designed for your lifestyle** – unique partition design in elbow reduces noise so you and your partner can enjoy a good night's sleep.
- **Includes convenient draw-string bag** to fit your lifestyle and travel needs.

## Intuitively easy

- **First-time fit** – it's easy to adjust to therapy when your mask fits you well the first time you put it on. Your Mirage Micro is designed to fit comfortably the first time and every time.
- **Ready to wear** – handy headgear clips are easy to attach and detach, saving your optimal headgear settings so you can "set and forget!"
- **One-handed adjustment** – there's no need to take off your mask to use the MicroFit dial. You can simply adjust the dial with one hand while wearing the mask, and even while lying down.
- **Easy to care for your mask** – fewer and simplified parts make your mask easy to assemble, disassemble and clean.
