# NEW UPDATES GIVE YOU SOMETHING TO ROLL WITH.

The easiest-to-use mask we've ever made is now an even easier choice to make. With updated features, our OptiLife nasal mask has more options and more flexibility than ever. So now, it's even simpler to fit more patients with a mask that's not only right for their lives... it's a great fit for yours.

**OptiLife™**  
Nasal Mask

Envisioning tomorrow. Improving today.™

# OptiLife™

## Simple. Secure. Versatile.

Striving to provide you with even simpler, more sensible and more natural sleep therapy solutions, we've enhanced our highly popular OptiLife nasal mask to better fit the lives of patients, homecare providers and sleep lab professionals.

More than ever, patients will appreciate how easy OptiLife is to wear, clean and maintain. Updated mask tubing provides increased flexibility, assuring that OptiLife stays put, no matter what sleep position the wearer chooses. And now patients can choose the popular OptiLife nasal pillows design or an all-new CradleCushion™ style – an ideal choice for those who want a minimal-contact mask but who may not be comfortable with pillows cushions.

With its advanced headgear design and integrated chin support band, OptiLife can be put into place with one hand – almost as simply as putting on a ball cap. And adjustments can be made with little effort.

Sleep professionals will find that OptiLife makes it quick and easy to obtain proper fit and seal for a wide range of patients. Because OptiLife is packaged with multiple cushion sizes, first-time fit is straightforward, inventory management is enhanced, and callbacks are less likely.

The newly enhanced OptiLife has even more options and flexibility to fit your life.

*Easy-to-adjust headgear design has no buckles – and it keeps the forehead and vision area open.*

*Pillows cushions are available in four sizes (petite, small, medium, large) to ensure an excellent seal.*

*Durable universal faceplate is easy to clean.*

*Exhalation port gives quiet and diffused airflow.*

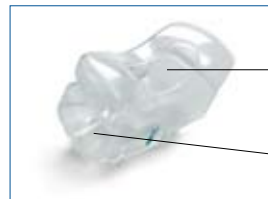

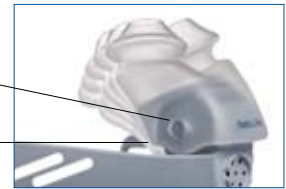

*Two headgear slots give additional options to improve patient comfort and seal.*

*Chin support band provides a secure fit and ensures mask stability.*

*Simple attachment hub provides a secure cushion attachment and allows the cushion to rotate for an optimal fit.*

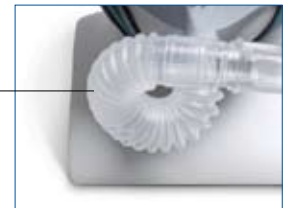

*Visual indicators provide orientation for proper cushion assembly.*

*Generous landing area and deep arc of the CradleCushion cradle the nose for excellent comfort and seal. Available in four sizes (small, medium, large narrow, large).*

*Groove accommodates side-to-side movement.*

*Enhanced mask tubing moves freely with the wearer. The mask stays put for an optimum seal.*
