

Where comfort lives.

Presented With Compliments From
www.DirectHomeMedical.com

New to Respironics' Comfort Series™, the **ComfortClassic™** Nasal Mask raises the standards of comfort and convenience to deliver the right fit for your patients. From its new two-position gel spacer. To its reshaped membrane-thin silicone cushion. To an all-new "silent" exhalation port. It's more than a mask your patients live with. It's where comfort lives.

t h e c o m f o r t s e r i e s ™

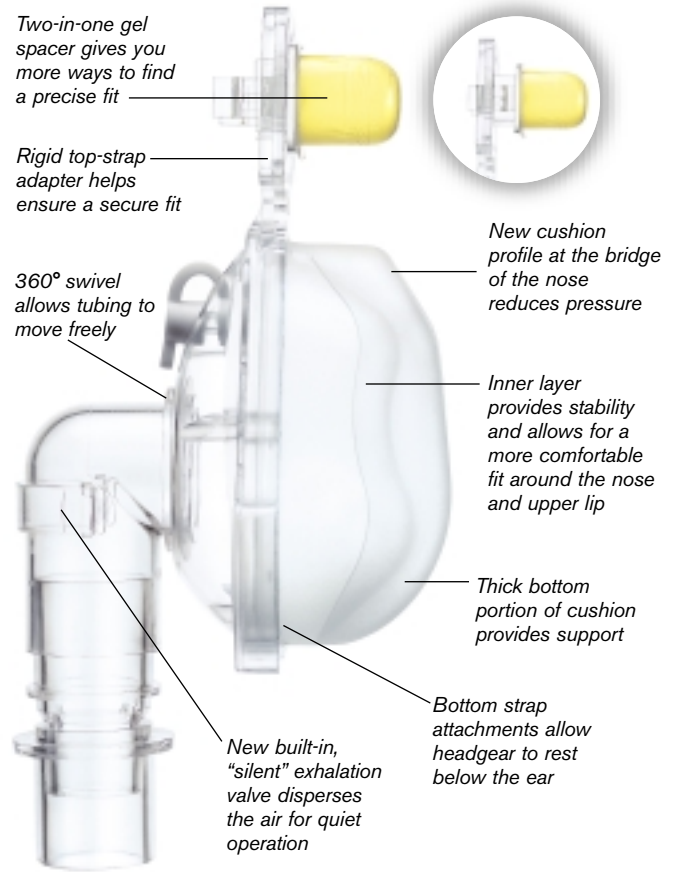

ComfortClassic™

The latest addition to The Comfort Series™ of masks delivers a more comfortable fit for your patients – and your business.

We designed the ComfortClassic to fit the same patient population with two mask sizes as previous masks did with three – so it's easier to stock. An integrated sizing gauge on the ComfortClassic's packaging helps in sizing and cuts down on mask waste by letting you determine the right mask size for your patient – before you open the bag.

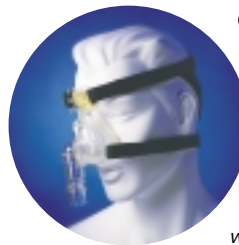

For your patient, improved comfort starts at the point of contact. The ComfortClassic features a dual-thickness silicone cushion with an outer membrane that fills with air to create a comfortable seal. The thicker inner section provides stability.

A dual-position gel spacer molds to the wearer's forehead for even greater comfort and stability. ComfortClassic even features headgear attachment points positioned below the ear for more secure headgear placement. Combine these comfort features with an easy-to-maintain three-piece design, and you have a mask that may help to improve patient compliance. That's a feature anyone could be comfortable with.

ComfortClassic uses Respironics' one-size-fits-most **Deluxe Headgear**. This unique headgear with Velcro® tabs easily adjusts in eight places for a secure, custom fit. The Deluxe Headgear evenly distributes tension, adds stability and helps to prevent mask leaks. The ComfortClassic and Headgear disassemble easily for cleaning and replacement. The Headgear can be used with most Respironics' masks.
