V.I.P. 76™
ORO-NASAL
(Full Face) Series
The Vmask™ Line
Oro-Nasal (Full Face) CPAP/BILEVEL Mask Series for Home Non-Invasive Positive Pressure Ventilation (NiPPV) and Hospital Non-Invasive Ventilation (NIV) in SAICU.

- **5 sizes** to cover wide range of patient sizes.
- Face piece with **integral sealing flange** is a single-piece mask, made of soft silicone rubber for improved comfort. **This lightweight mask piece cannot break.**
- Anatomically-contoured design with ribbed support for a leak-free, comfortable and stable fit. Anti-Asphyxia Valve (AAV) adds to effective safety features in Non-Invasive Positive Pressure Ventilation (NIPPV).
- **360° dual swivel elbow port** 22 mm Male Outside Diameter and 22mm Female Inside Diameter for improved patient freedom of movement and easier mask connections to patient circuits and valves. **Mask air vent holes** effectively and quietly dissipate CO₂.
- Comfortable “Quick-release” **lightweight headgear** with 4 Quick-Release Locking-type Clips (for easy mounting & dismounting and eliminating nuisance slipping during Sleep), available in 2 sizes.
- **7600 Vmask™ is validated** for cold chemical high-level disinfection or steam autoclave sterilization and dishwasher safe. Resistant materials used to manufacture Vmasks™ make the line last longer.

This is a multi-patient, multi-use equipment.

7600 Vmask™ is easy to install, lower cost to maintain.

**Optional Sensa Seal™ flange**, made of soft silicone, fits each of the 5 VIP™ sizes to allow improved leak-free ventilation and additional comfort.
### VIP 76™ Complete Mask Assemblies
