

THE CPAP PRO® DIFFERENCE

NASAL PUFF ASSEMBLY
Lite-Touch Silicone Nasal Puffs™ provide prescribed oxygen to nose without excessive, irritating pressure against nostrils.

CURVED BRACKET
Customizes CPAP PRO® for patient's maximum comfort. With simple adjustments a variety of facial configurations can be accommodated.

EXHALATION DIFFUSERS
Micro-Porous foam diffusers surround the dual exhalation ports to eliminate inhalation/exhalation sounds and air blowing on to the patient's face.

ADJUSTABLE HOSE CLAMPS
Stabilizes the corrugated respiratory tubes giving the patient the ability to adjust the CPAP PRO® to their individual facial features as well as adjust the Nasal Puff's pressure against the nostrils.

BOIL 'N BITE MOUTHPIECE
Comfortably and securely affixes to the upper teeth assuring that all components remain in perfect relationship with the nostrils no matter how much the patient twists and turns during the night.

CORRUGATED TUBES
Enables the patient to have maximum range of movement and sleeping positions allowing twisting and turning during sleep.

Y COUPLING
Enables the CPAP PRO® to quickly connect to all CPAP machines and main hoses. Simply remove existing nasal interface from main hose and insert "Y" coupling.

WHAT OUR CUSTOMERS SAY:

After using the CPAP PRO® I have found it far superior to a mask. The mouth piece was easy to adapt to and the nasal portion easy to adjust for a comfortable fit and turning from side to side is no problem, especially with the overhead swivel.

Purchased the CPAP PRO® a couple of weeks ago. It truly is everything you say about it and MORE! The first night of use was wonderful, no delays in getting use to it.

~John Karstette

Thank you SO MUCH. I got it Friday and have slept like a baby every night since.

~George Douglas

Just received my CPAP PRO® two days ago. This is fantastic! Takes a bit of getting used to, but is virtually a miracle. After 6 years of using a standard type mask, I finally woke up with no facial irritation or eye pain.

~Wes Belder

I've been using CPAP PRO® for over two years now and absolutely can't wait to go to bed every night. Thank you so much for developing this super product. NO MORE MASKS. I've told many of my friends about the CPAP PRO® who are now loyal customers. Thanks again.

~Ken Birkes

Thank you, this product is fantastic. It really works and is so much better than the mask I had been wearing. I love my CPAP PRO®!

~Y. K.

I have been using the CPAP PRO® now for 16 months and to tell the truth, I have no idea how I survived without it. The CPAP PRO® is the perfect answer for me: easy to use, comfortable, and easy to maintain.

Thank you for providing it for me and other sleep apnea sufferers.

~Bill Dorn

I am a health professional and the spouse of a physician. I have had OSA for a number of years and have tried numerous CPAP masks in an effort to achieve optimum comfort and therapeutic benefit. I have finally found both with the CPAP PRO® headgear. Simply, Thank You for the best CPAP headgear on the planet!

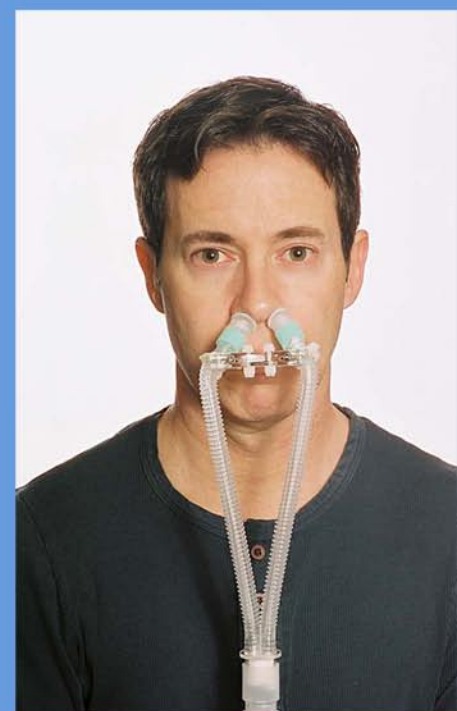

~Andrew L. Irwin

Your product is wonderful! It has helped me a great deal as I regain the loss of sleep over many years. I was miserable and in poor health. Now I am feeling 100% better since using your product.

~Patrick Randazzo

Probably saved my life, I'm sleeping all night. I'm not sleeping driving home from work.

~Mick Cochran

COMMON QUESTIONS:

What is a Boil 'n Bite Mouthpiece?

Similar to a sports mouthpiece used by athletes, the CPAP PRO® is customized to your exact dental configuration in just minutes right at home. Once formed the CPAP PRO® will comfortably snap on to your upper teeth and stay in place throughout sleep. You can sleep in any position and all the nasal components stay in place eliminating the leaks, the skin irritation and sleepless nights!

What if I open my mouth during sleep?

Even if you open your mouth the CPAP PRO® mouthpiece will stay affixed to your upper teeth... it is not necessary to bite down on the mouthpiece throughout the night.

How is the CPAP PRO® system different from CPAP masks?

Without annoying straps or headgear, CPAP PRO® makes the use of CPAP more tolerable by eliminating the pain, sores and claustrophobic panic feelings of conventional CPAP breathing devices and CPAP machines. CPAP PRO® is designed to minimize skin contact so that it is far easier to forget that it is there and sleep comfortably.

Will CPAP PRO® work with my existing CPAP or BIPAP machine?

What is recommended maximum pressure?

CPAP PRO® works well with all types of sleep apnea machines. In most instances nasal pillow cpap interfaces are recommend with pressures 13 or less. However, we do have patients using CPAP PRO® at pressures in the 18-20 range with good results!

Do I have to bite down on the mouthpiece all night long to keep it in place?

No, once you prepare your Boil 'n Bite mouthpiece it will comfortably snap on to your upper teeth and stay in place without the need to bite down on it.

Should everyone use a Boil 'n Bite mouthpiece?

Patients with serious dental problems should consult with their dentist before utilizing CPAP PRO®, since CPAP PRO® snaps on to the patient's upper teeth.

How long will CPAP PRO® last, how do I clean it, and what about replacement parts?

With normal care and periodic parts replacement, CPAP PRO® will last several years. Most patients clean CPAP PRO® in warm water with DAWN and clean the mouthpiece with ActiPro™. Replacement parts are available from our office or online store.

To order your CPAP PRO® Today go to www.nomask.com or call 800-538-8803
