# Comfort with every turn

Introducing DreamWisp minimal contact mask from Philips Respironics, the #1 sleep therapy\* brand† of U.S. sleep physicians. DreamWisp helps your patients sleep comfortably with every turn because it marries the freedom of DreamWear's revolutionary, top-of-the-head tube design with the seal of Wisp's minimal contact nasal cushion.

Now, you can provide your patients with an innovative solution that lets them sleep how they want without having restrictive tubing on the face. DreamWisp's design directs airflow through the frame so patients can sleep comfortably, and the tubing connection at the top of the head allows patients to sleep in any position they want – on their stomach, side or back.

## Benefits of DreamWisp

- Tubing at the top-of-the-head allows patients to sleep in any position they want
- Airflow through the mask frame allows patients to sleep comfortably
- Minimal contact nasal cushion provides comfort and seal
- Four-point headgear provides stability

# DreamWisp

**Top-of-the-head  
tube connection**

Provides freedom of  
movement throughout  
the night

**Silicone frame**

Light, flexible material

\*April 2018 Clinician ease of use trial, n = 30 compared masks included ResMed Airfit N20 and PRI DreamWisp

# DreamWisp **patient fitting guide**

Follow the instructions to get started fitting your DreamWisp mask

1	 A close-up of a person's nose with a finger pointing to the cushion of the mask.	Select the cushion that fits the width of your nose without blocking your nostrils. The top of the cushion may sit between the bridge and the tip of your nose. There are five cushion sizes available: petite, small, medium, large, extra-large
2	 A close-up of hands unclipping a magnetic clip from the mask's strap.	Unclasp one or both of the magnetic clips from the magnetic clip receiver.
3	 A person pulling the headgear of the mask over their head.	Pull the headgear over the top of your head.
4	 A person placing the cushion of the mask over their nose.	Place the cushion over your nose.
5	 A person clasp the magnetic clips of the mask to the magnetic clip receivers.	Clasp the magnetic clips to the magnetic clips receivers.
6	 A person adjusting the headgear of the mask by pulling the bottom tabs away from the fabric.	To adjust the headgear, peel the bottom headgear tabs away from the fabric. Evenly adjust the length of the straps. Press the tabs back against the fabric to reattach. Repeat this step with the top straps.
7	 A person positioning the mask until it fits comfortably.	Position the mask until it fits comfortably. When finished, the elbow should rest at the top of the head. The cushion should rest comfortably on your face without blocking your nostrils. <b>Note:</b> Please read the Instructions for use for further fitting information.
