NEWLIFE® INTENSITY®
Stationary Oxygen Concentrator

HIGH FLOW AND HIGH PRESSURE COMBINED
Combining high flow and high output pressure makes the Intensity the premier high flow stationary concentrator for at home and facility use.

HIGH-PRESSURE APPLICATIONS
The Intensity has an output pressure of 20 psi (137.9 KPa), more than double any other high flow concentrator.

8 LPM OR 10 LPM OPTIONS
The NewLife® Intensity is available in both 8 LPM and 10 LPM models. The 8 LPM is an ideal low cost option where the highest flow settings are not required. Drawing 30% less power than the 10 LPM models, the 8 LPM still provides the high output pressure for medical applications.

DUAL FLOW OPTION
Unique to the NewLife® series of concentrators, the Dual Flow option features two separate flow meters that can provide a total of 8 or 10 LPM. Allowing two patients to get oxygen from one machine simultaneously, this is perfect for hospitals, long term care facilities, clinics, waiting rooms, or day and night time settings.
