Good News...

Relief came when I found O2 Ear Buddies.
They helped me from
getting sores behind my ears due to using oxygen.

Joe P.

I have been on oxygen for five years and
within the first few weeks I
developed painful sores on the back of
my ears. I don't know what was worse,
being sick with COPD or the sores on my ears.

My home care nurse
prescribed many treatments, but all of
them still placed the oxygen
tubes back on my ears. Once I found
O2 Ear Buddies, they gave
me the relief I desperately needed.

Ronald C.

I have been a registered nurse for
twenty five years and have seen
numerous patients subjected to the
common ear pain correlated with
oxygen use. This is a great product for
health care providers to help
their patients find as much comfort
as possible while on Oxygen
Therapy. I believe that oxygen patients
should be wearing O2 Ear
Buddies to heal and prevent all pain associated
with the nasal cannula.

**Faye S.
Registered Nurse**

As a respiratory therapist for over
twenty years, I have seen many patients
with skin breakdown due to the nasal cannula.

I am very excited to see
a product that will not only help patients
with skin breakdown heal, but
will be able to prevent the breakdown
in the first place. Every patient
that is given a nasal cannula should be
wearing one of these.

**Michelle S.
Respiratory Care Practitioner**

“Relief For Your Sore Ears”

“Relief For Your Sore Ears”

O2 Ear Buddies

Our Story

O₂ Ear Buddies are the cost effective solution against chaffing, irritation and pressure sores caused by nasal cannula (oxygen tube) rubbing on the back of the ears.

O₂ Ear Buddies will not only treat the symptoms, but prevent them all together.

My father was placed on long-term oxygen and immediately developed sore ears. No matter what the medical staff did to treat my father's symptoms, it was only a temporary fix. After many years of witnessing him suffer from wearing oxygen and watching his constant irritation slowly progress into a decubitus ulcer, I developed the **O₂ Ear Buddies**.

My goal was to create a unique product that allows everyone to choose their own comfortable hat, headband, visor, etc., to promote healing and instant relief by taking the nasal cannula completely off the ears. After using the **O₂ Ear Buddies**, his symptoms immediately subsided and the common recurring issue my father developed had been cured. Our wish for every person on oxygen is to relieve the burden of the usual pain and suffering associated with the nasal cannula.

Mission Statement

Our mission is to earn the trust and respect of our customers that are using oxygen; by providing a economical solution to their ear pain.

O₂ Ear Buddies Main Focus:

A Simple Solution to Make Wearing Oxygen Comfortable Day to Day

Alleviates Pressure, Allowing the Nasal Cannula (Oxygen Tube) to Directly By-Pass Back of Ears

Further Prevents Tissue Breakdown Behind Ears

Ensures Secure Placement of Nasal Cannula (Oxygen Tube) Above Ears

Made of Durable Lightweight Medical Grade Plastic

Reusable and Easily Transferable

Promotes Patient Compliance

Latex Free
