One oxygen concentrator for
on the go, at home or sleep

Our first and only portable and stationary oxygen concentrator

It's time for one oxygen concentrator to meet the needs of your patients, whether they're at home or on the go. SimplyGo is the one that can do it.

With the ability to offer continuous flow and pulse-dose delivery in a single device, you can now manage the therapy and lifestyle needs of nearly all of your patients.

Did you know?

As a general rule, it is more economical to use an oxygen concentrator rather than cylinders if oxygen is required for more than eight hours per day or if prescriptions exceed 21 cylinders per month!

Lightweight, flexible and powerful

SimplyGo is the only continuous flow oxygen concentrator to weigh in at 10 pounds – more than twice the oxygen output of any POC weighing 10 pounds or less. And for patients who need higher pulse settings at night, the sleep mode provides increased trigger sensitivity and a softer pulse for exceptional comfort.

Did you know?

To give you added peace of mind, if the SimplyGo does not detect breath on pulse flow mode, it will automatically switch to continuous flow to provide your patients with the oxygen they require.

Simply meeting everyone's needs: **yours and your patients'**

SimplyGo can be your go-to concentrator for nearly all of your patients while helping to reduce your cost of providing oxygen therapy by:

- ✓ Reducing recurring oxygen delivery costs and cylinder hassles
- ✓ Reducing maintenance costs
- ✓ Easing inventory management
- ✓ Minimizing service calls
- ✓ Allowing billing for both codes: E1390 and E1392
- ✓ Replacing or augmenting RT visits

During development, SimplyGo was rigorously tested and subjected to extreme conditions including impacts, vibrations and temperatures to deliver reliable performance day in and day out.

Built to last

With patients relying on one device for their comprehensive, required oxygen needs, you need to know it's built to meet any challenge. With a long-life compressor, high-quality parts, a high-impact resistant design and oversized cart wheels, this POC was built to set new standards of ruggedness.

Did you know?

Approximately 57% of all patients requiring oxygen therapy are prescribed 2 liters of oxygen per minute and demand high portability requirements or standard portability requirements.¹

Fits your **patients' lifestyles**

SimplyGo's lightweight, sleek style and ease of use make it appealing to patients as the only oxygen concentrator they'll need at home or on the go. With its attractive and highly functional carrying case, patients either carry SimplyGo over the shoulder or place it on the easy-to-pull, easy-to-store cart. SimplyGo is able to keep up with portable oxygen users' needs today and tomorrow.

Did you know?

SimplyGo is ideal for patients who travel. It offers pulse flow and continuous flow, it's small and compact for easy storage and it's built to run 24-7. With the SimplyGo, you have a portable and a stationary oxygen concentrator in one unit.

A woman with short brown hair, wearing a bright red dress and a clear oxygen nasal cannula, is smiling warmly. She is holding a bouquet of white flowers. The background is softly blurred, showing what appears to be an indoor setting with other people.

Streamline your business

Since SimplyGo meets the needs of nearly all of your patients, you can greatly simplify your inventory management and use less shelf space, helping you to lower costs and streamline patient services. And, SimplyGo's ability to provide continuous flow in a small, lightweight package is appealing to referral sources and patients.

Did you know?

SimplyGo can be set up on a patient immediately post-discharge with no need to swap out for other equipment.

SimplyGo is equipped with sleep mode technology and it's compatible with CPAP and BiPAP machines – so you know you will be able to use this machine for nighttime oxygen delivery. This means you won't have to set up a rental unit when you get to your destination. Just bring the SimplyGo and you are covered.
